# Supplementary Material for Reviewers

Manuscript: “Honest Evaluation of Underwater Acoustic Target Recognition: Decomposing, Predicting, and Reducing Benchmark Variance”

This document lists every released per-draw result backing the paper’s aggregate statistics. Column *scheme* is the allocation/recipe tag embedded in each run id; *source* is the Kaggle session log that produced the run. The full release (frozen splits, training code, per-clip predictions, aggregation JSONs, figure scripts) is at `https://github.com/gzhgzy1234567890-lang/uatr-honest-evaluation`

Table 1: Run manifest (all 165 released draws).
